

How to Make an Ocean Drum

Why not make an ocean drum to bring along with you to our concert for joining in? But don't worry, you don't need to make one to enjoy the fun on the day!

Supplies Needed:

- 2 paper plates, or 2 paper bowls
- Filling of your choice (see step 3)
- Sticky tape/staples/glue
- Paints/Glitter/Tinsel/Other decorations

A night sky ocean drum

Steps:

1. Decorate the bottom (the side that would sit on the table) of one or both paper plates as you wish.
2. Stick the plates together by gluing or stapling the rims, and then seal shut with sticky tape BUT leaving a gap at the top to pour in your filling. Make sure it is tightly sealed so that the filling cannot escape.
3. Explore the sounds of different dried goods like rice, lentils, couscous by shaking them in some lidded Tupperware. When you find a sound you like, tip it into the ocean drum body.
4. Seal the gap as above and your ocean drum is ready.
